

We are a people with a just cause

While the world is drowning in silence, the resistance in Palestine speaks to the world in a loud, clear and honest voice. The resistance in Palestine under the banner, "Hunger and not submission", has withstood daily Zionist attacks and criminal international blockade with extraordinary perseverance and steadfastness. The resiliency shown by the people of Gaza is of a people who understand justice. A people who are not afraid to call the unjust "unjust". Under all this pressure, the resistance has been able to accomplish the impossible. It has reconnected itself with other parts of Palestine through launching missiles on Zionist colonies, severed its dependence on Zionist controlled goods and services by bringing down the wall of international injustice, and made it clear to all that the people of Gaza will not be humiliated.

From one victory to another

Bush's latest visit to the region is that of an emperor to his underachieving subordinates. His lesson to them is to be more ruthless. Hence, the subordinates are more exposed than ever. Official cooperation with the Zionist entity is the norm and oppression of protestors in the streets of Cairo, Beirut, and Ramallah has reached a new level. The divine victory of our brethren in Lebanon has shaken the Zionist system and exposed its inherent weakness – that it cannot exist without the cooperation of the subordinate regimes in the region.

The model of resistance in southern Lebanon and Gaza is capable of achieving justice for the people of the region by freeing them from the grip of subordination and ultimately realizing the defeat of the Zionist system. The U.S. government and the Zionist system understand fully the ramifications of the current resistance model. For this reason, it is crucial at this point to support the resistance in Lebanon, Palestine and Iraq and spread the model across the region and across the globe to empower people and confront injustice.

Palestine is resisting

With the formulation of Abbas's new subordinate regime in Ramallah by the U.S. government and the Zionist system, it is crucial to remind people that the majority of Palestinians support the resistance model. In fact, Palestinian resistance is not limited to the West Bank and Gaza but includes 1948 Palestinians across Palestine. Daily demonstrations are organized in the Galilee and Muthalath against house demolitions, historic mosque demolitions, unearthing of cemeteries, and weekly convoys of tens of thousands to Al-Quds (Jerusalem) are organized to confront Zionist Israel's attempts to enforce its racist Jewish only vision of Al-Quds. Palestine and Palestinians are definitely resisting on all levels and resistance shall continue until injustice disappears.
